Welcome to the latest addition of our new newsletter. Each issue will provide the latest information, examples and news on our unique Applied Polymer Systems and Coatings. At ENECON Northeast we are dedicated to solving your toughest fluid flow repair and maintenance problems.

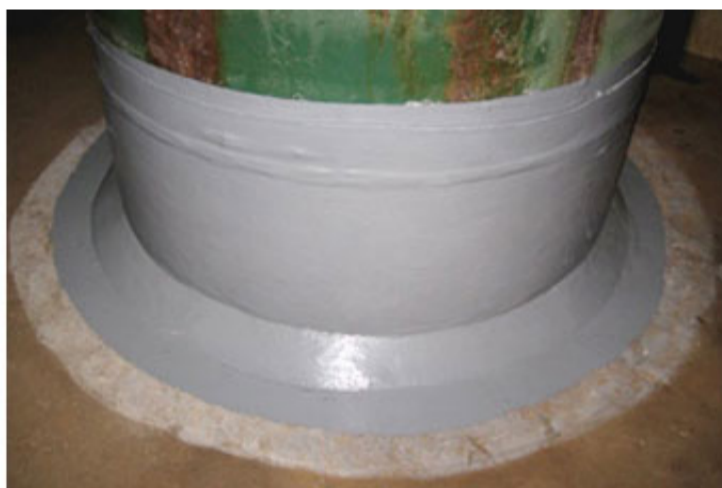

EXPERIENCED FIELD ENGINEERING AND PROJECT SERVICES

FEBRUARY 2010 | VOLUME 2, ISSUE 3

ENECON North East recently completed the external preparation and fiber reinforcement of four 56 " OD condenser water discharge pipe sections located at a Northeast Power Plant. The section of the pipes were wrapped with the ENECON DuraWrap synthetic fiber reinforcing system from the concrete deck up approximately four feet. The project included the preparation, reinforcement and coating of external pipe surfaces including the installation of a Polymeric Mortar Wedge at the pipe to floor interface to prevent standing water degrading the external surface of the pipe.
