ENECON Coatings Repair and Protect 35 Year Chiller

ENECON Northeast APS now provides additional services to our clients through our Pipeline Rehabilitation division: Applied Polymer Services/APS

Digital CCTV Inspection

Using the latest CCTV equipment and reporting methods, we can provide unmatched quality, flexibility and reliability in pipe line inspection. Trouble spots, such as cracked or broken tiles, offset joints, and blockages are quickly and precisely located without excavation. Our software produces the most sophisticated, yet user friendly, data collection, analysis, reporting and archiving.

Pipeline Rehabilitation

Extending the useful life of your pipeline infrastructure with pipe rehabilitation is a critical component of effective asset management. The Applied Polymer Services team has the expertise to strengthen the pipe structure, repairing broken or leaking underground water lines both, horizontal and vertical, utilizing felt steam cured and fiberglass UV cured from 4" to 72" diameters.

Contact us for a free consultation regarding your piping infrastructure!
